WORK HISTORY AND KEY ACHIEVEMENTS

PVD COATING ENGINEERING | R+D DEPARTMENT Zanini Auto Grup, S.A.U. | Parets del Vallès, Spain

05/2014 to CURRENT

- Responsible of coatings designing in a prominent project for BMW radome parts, for advanced driver-assistance systems (ADAS), which will result in a 136% production growth of radomes in 2019 for Zanini.
- Designed and developed new PVD coatings for automotive emblems resulting in annual production growth of those parts every year.
- Implemented a method that improved the manufacturing of RF transparent coatings for ADAS radome emblems, as part of the first serial production of those parts launched by Zanini in 2014.
- Supported production and quality departments to achieve validation of radome parts for several automotive OEM's.
- Supported the R+D director with monthly innovative solutions for automotive trim parts containing PVD coatings.
- Achieved a significant reduction of trials during prototyping by calculating radio frequency attenuation at 77 GHz of PVD coatings to be used in ADAS systems.

EDUCATION

Ph.D. Candidate | Physics

CURRENT

Universidad de Barcelona, Barcelona, Spain

- Awarded with *Doctorats Industrials* scholarship.
- Received a recognition as participant of the pilot program *Doctorats Industrials*

M.Sc. | Nanoscience and Nanotechnology

2014

Universidad de Barcelona, Barcelona, Spain

- Awarded with *ADD* scholarship.

Summer school | Nanomaterials and applications

2013

Utrecht University, Utrecht, Netherlands

B.Sc. | Physics

2012

Universidad Pedagógica Nacional, Bogotá, Colombia

SKILLS

- Skilled in optical simulations
- Innovative and open-minded
- Communication and public speaking
- Team liaison and conflict resolution
- Active learning
- Creative problem solving
- Self-motivated
- Mentoring

AFFILIATIONS

Member, Thin Films and Surface Engineering Group
Universitat of Barcelona, 2013 to Current

LANGUAGES

Spanish: Native
English: Advanced (TOEFL iBT® 93)
