Aptitudes principales

Thin Films
Vacuum Technology: Sputtering
Nanomaterials

Languages

Spanish (Native or Bilingual)
English: TOEFL iBT; advanced
93/120 (Full Professional)

Honors-Awards

Reconeixement dels Doctorats
Industrials (Recognition member
in the pilot program of industrial
doctorates)

Dr. Jerson Peralta

PhD | Functional Surfaces R&D Leader | R&D AI Adoption Head en
Zanini Auto Group
Barcelona y alrededores

Extracto

Researcher focused in the development of vacuum functional
coatings deposited on plastic parts for automotive applications

Experiencia

Zanini Auto Group
12 años 2 meses

Functional Surfaces R&D Leader
enero de 2026 - Present (6 meses)
Barcelona y alrededores

Responsible of the Functional Surfaces R&D team:

- R&D Project Management: Steering advanced material and coating projects from concept to industrial scale.
- Vacuum Deposition & Thin Films: Developing nano-coatings for metallized plastics via PVD magnetron sputtering, PECVD, and e-Beam.
- Organic Coatings & Inks: Designing functional organic coatings, specialized inks, paints, and adhesives.
- Surface Functionalization: Modifying polymers and advanced materials to introduce smart, functional surface properties.
- Computer Simulation & Modeling: Utilizing computational tools and optoelectronic models to design novel materials.
- Automotive & ADAS Innovation: Engineering high-performance and sensor-compatible coatings for automotive trim.
- Film Characterization: Testing and analyzing the performance of both vacuum and wet-chemical thin films.
- Industrial Troubleshooting: Resolving technical issues to optimize large-scale deposition and coating processes.

AI Adoption Head
enero de 2026 - Present (6 meses)
Barcelona y alrededores

- Strategic Roadmap: Define and execute the AI adoption strategy for R&D, aligning machine learning and generative AI initiatives with automotive engineering goals.
- Cross-Functional Leadership: Bridge the gap between data science teams and traditional automotive engineers to identify, pilot, and scale high-impact AI use cases.
- Advanced AI Implementation: Deploy and scale AI-designed engineering tools, Retrieval-Augmented Generation (RAG) systems, and machine learning models tailored to automotive R&D workflows.
- Change Management: Foster an AI-first culture within R&D through targeted training programs, workshops, and continuous upskilling initiatives.

Nano-Coatings R&D Leader

octubre de 2019 - diciembre de 2025 (6 años 3 meses)

Barcelona y alrededores

Responsible of the Nano-Coatings R&D team within the Advanced R&D and Innovation department:

- Management of R&D projects.
- Development of nano-coatings for metallized plastic parts by PVD magnetron sputtering, PECVD and e-Beam processes.
- Characterization of functional thin films.
- Development of novel thin film solutions with improved functional performance for automotive industry parts.
- Research in applied optoelectronic models to design new materials and novel solutions.
- Research in functionalization of polymers in vacuum deposition processes.
- Research and development of coatings for ADAS plastic trim automotive parts.
- Support in trouble shooting of industrial deposition processes.

Nano-Coatings Scientist

marzo de 2019 - octubre de 2019 (8 meses)

Barcelona y alrededores, España

Coating Innovation Support

mayo de 2014 - marzo de 2019 (4 años 11 meses)

Barcelona y alrededores, España

Educación

Universitat de Barcelona

Doctor of Philosophy (PhD), Nanoscience · (junio de 2021 - junio de 2026)

Universitat de Barcelona / University of Barcelona

Master of Science (MSc), Nanoscience and Nanotechnology · (2013 - 2014)

Utrecht University

Nanomaterials: Science and applications, Nanotecnología · (2013 - 2013)

Universidad Pedagógica Nacional (CO)

Licentiate degree, Physics · (2006 - 2012)
